

Resolution Number 6

Transport Canada Resources

Whereas over the last number of years the budget for Transport Canada has been cut several times, and;

Whereas it has become obvious that Transport Canada no longer has the resources to properly complete its mandate, and;

Whereas industry is suffering from lengthy, costly, delays in obtaining basic services such as routine approvals from Transport Canada, and;

Whereas a number of routine processes and approvals have been identified by industry and Transport Canada itself as having no identifiable safety gain, and;

Whereas industry only foresees this situation becoming worse as there has been no discernible change to Transport Canada's requirements or operation;

Therefore, be it resolved:

That Government look to adequately fund Transport Canada to enable it to properly fulfill its mandate and that in the interim Transport Canada look towards expediting its initiatives to move out of non-valued processes and focus on safety oversight and industry support.

Passed at the 37th Annual General Meeting in Yellowknife, April 10, 2013
